## 4 reasons to participate

- > Home consultation with an advisor who could help you manage your energy consumption
- > Light work that we could done for you (caulking and insulation)
- > Improved home comfort
- > Fewer draughts

The program's normative framework takes precedence over this leaflet.

simple energy  
solutions  
for your comfort

# Éconologis

## a simple, free service!

The Éconologis program provides free help for low-income households to improve energy efficiency and comfort levels in their homes, whether they are tenants or owners. This program also allows to benefit from additional measures offered by energy distributors.

### Program goal

Provide personalized advice and products to improve energy efficiency, regardless of the type of energy used for heating.

### Period

The program is offered from October to March.

## Component 1

Receive a visit by an advisor and obtain practical advice about:

- › Heating
- › Hot water
- › Household appliances
- › Lighting

Take advantage of some of the following measures based on the needs identified by an advisor:

- › Caulking and weatherstripping windows
- › Installing weatherstripping on doors
- › Insulating electrical outlets on outside walls
- › Installing low-flow showerheads
- › Installing aerators on water taps

## Component 2

Receive a visit from a specialist who will replace old thermostats with electronic thermostats to improve your comfort<sup>1</sup>.

### Eligibility criteria<sup>2</sup>

For component 1:

- › Meet the income threshold

For component 2:

- › Have been visited by an advisor as part of Component 1
- › Receive a bill for home heating from an energy distributor
- › Obtain permission from the landlord
